

Control

Quickstart Guide

1

Connect your Control

Plug-in your Control unit and connect it to the network

2

Find your unit

Identify the Control unit you want on the network & select it via the Stem ecosystem platform

3 Name your unit

Give your Control unit a name

(Ex. Medium Conference Room -Control 1)

Please name your unit

Typical name might relate to the location of the device
ex. Room 304, Table Unit A

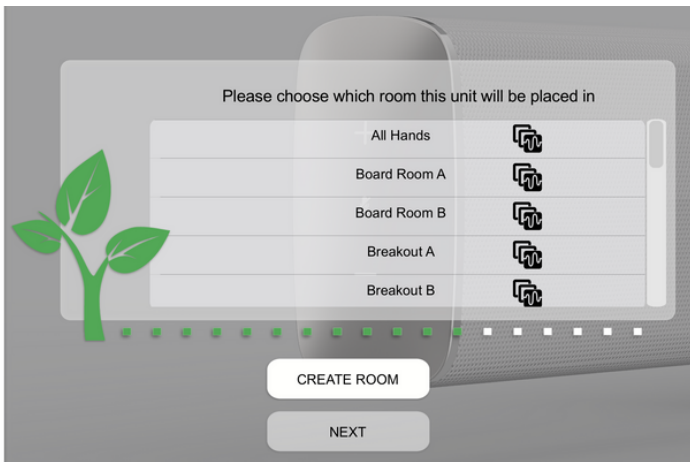

DEVICE NAME

A screenshot of a device naming interface. The background is a blurred image of a control panel. The text is centered and reads: "Please name your unit", "Typical name might relate to the location of the device", "ex. Room 304, Table Unit A", and a white rounded rectangular input field containing the text "DEVICE NAME".

4

Give it a home

Create a new room or choose which room this unit will be placed in via the Stem ecosystem platform
