stem audio

Huddle Room Reference Design

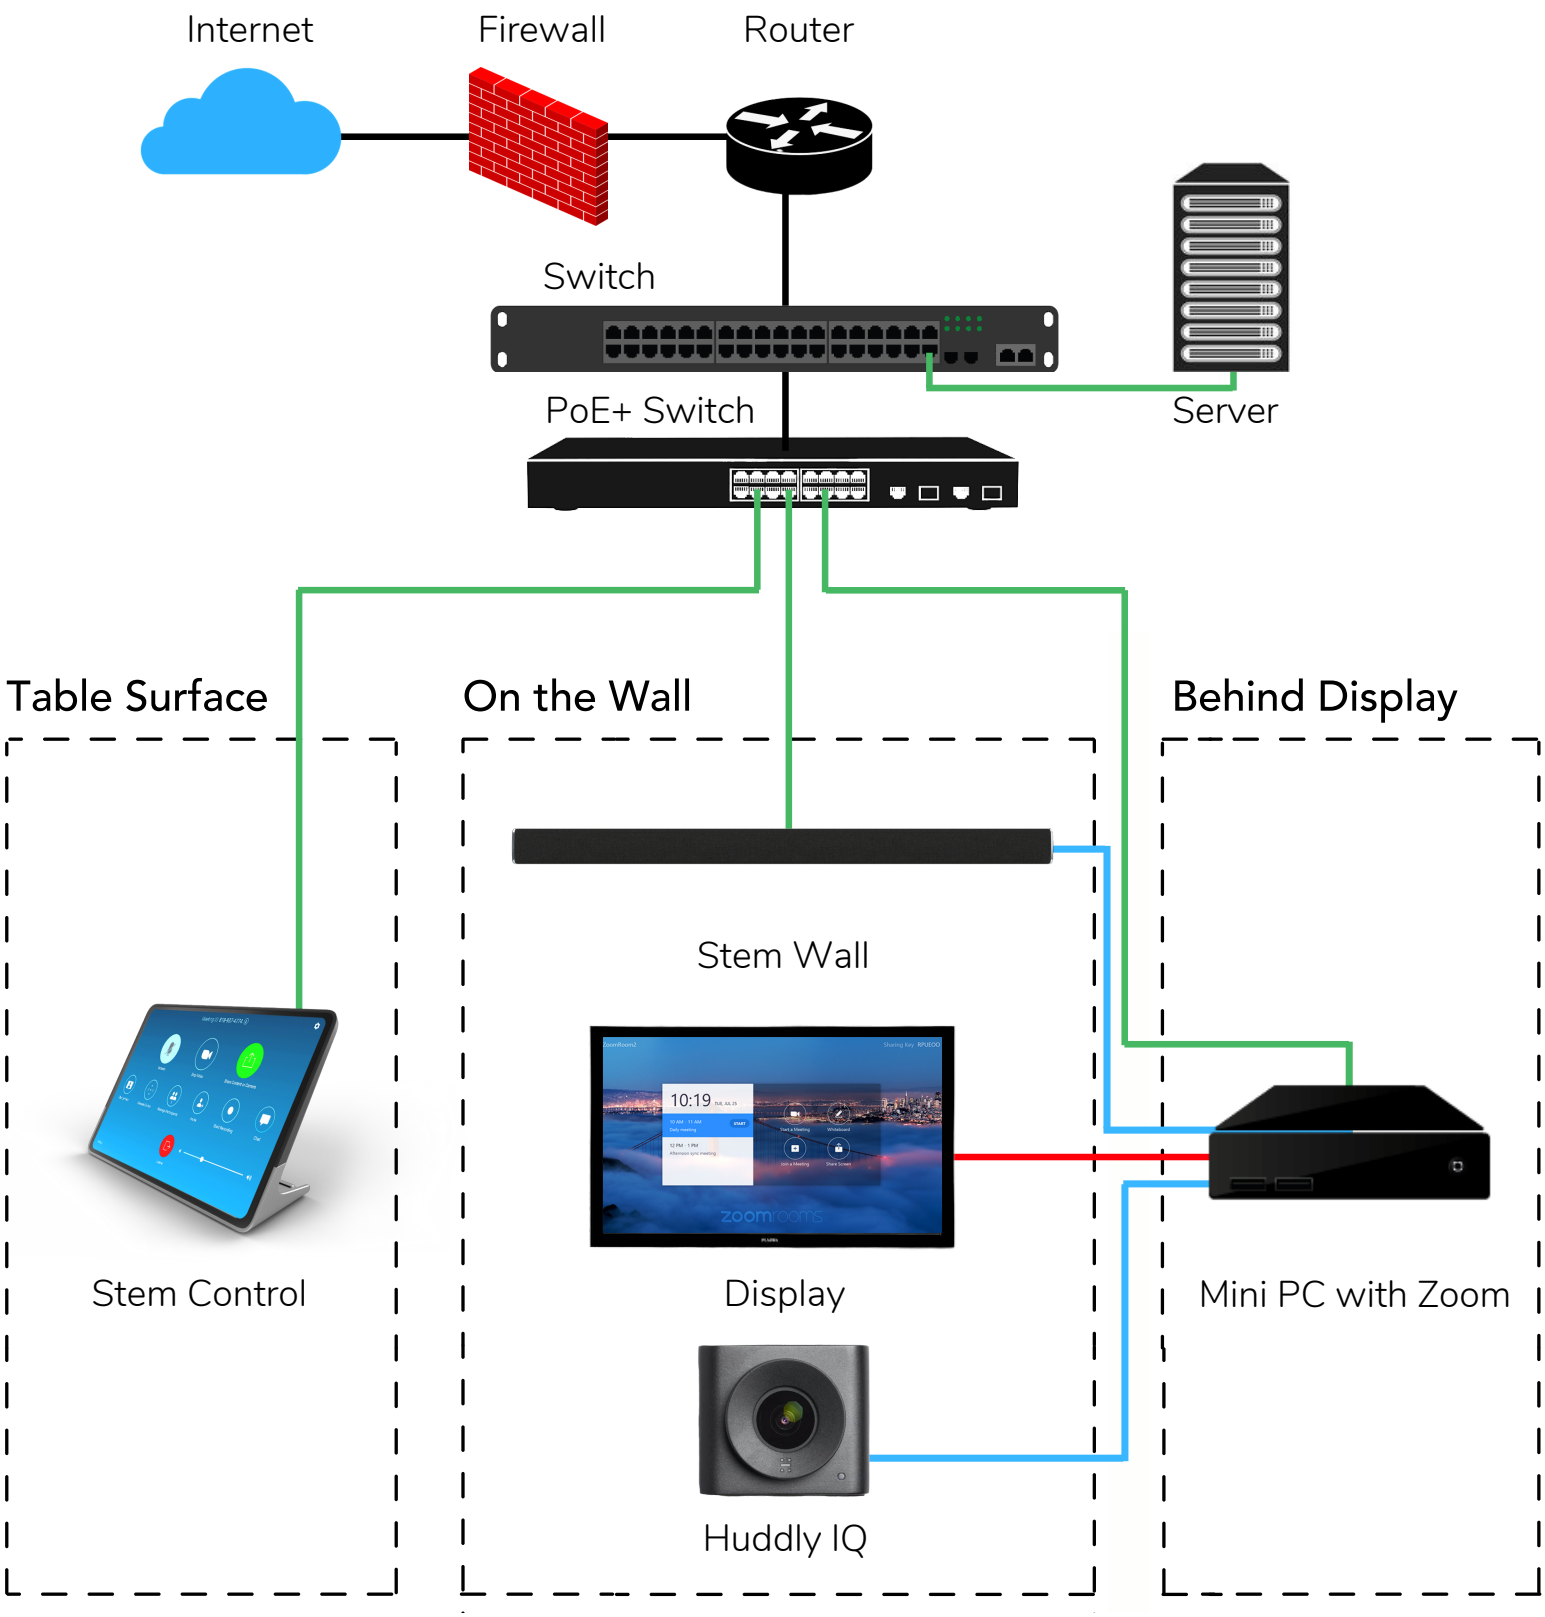
This design demonstrates just one of a few ways you can outfit your huddle rooms with Stem. Below you can see Stem Wall paired with Stem Control. Each device is connected directly to your network via a single Ethernet cable. Stem's ecosystem approach gives you the freedom to mix and match devices to create your own customized setup. If a Stem Table or Stem Ceiling is more your style, go for it. This is your room. Design it to fit your needs.

Mix and match all Stem devices for a customized audio solution.

Set up, control, and manage your rooms and devices on your network.

Stem solutions are 100% compatible with your favorite conferencing platforms.

How It All Connects



Connection Key

HDMI Cable

USB Cable

Ethernet Cable
